

IQ8 Series Microinverters

The high-powered, smart grid ready Enphase IQ8 Microinverters are designed to match the latest generation high output PV modules. The IQ8 has the highest energy production and reliability standards in the industry and with Rapid Shutdown functionality it meets the highest safety standards. The brain of the semiconductor-based microinverter is our proprietary, application specific integrated circuit (ASIC) which enables the microinverter to operate in a grid-connected mode.

IQ Gateway

Part of the Enphase Energy System, IQ8 Series Microinverters integrate with the IQ Battery, IQ Gateway, and the Enphase App monitoring and analysis software.

IQ Relay 1P and 3P

Production and storage circuit, integrated NS-protection device with PLC-Phase coupler (3P) and DC current injection monitoring.*

IQ8 Series with Integrated MC4 connectors

Connect PV modules quickly and easily to the IQ8 Series Microinverters that has integrated MC4 connectors.

IQ Cabling

Install microinverters quickly and safely with IQ Cabling. With 3P IQ Cabling, the installed capacity is automatically distributed evenly across all three phases.

			No enforced DC/AC ratio and maximum input power. Modules can be paired as long as the maximum input voltage is not exceeded and maximum input current of the inverter at the lowest and highest temperatures are respected. 		For IQ Cable with 2.5mm ² stranded conductors and using a 1.25 safety factor, 16 A per phase is calculated as maximum current according to IEC 60364. Safety factor applied may vary based on local regulation or best practice, also upon the characteristic the OCPD selected.						
Maximum units per single / multi-phase IQ Cable section			8 (L+N) / 18 (3L+N)		8 (L+N) / 18 (3L+N)		8 (L+N) / 18 (3L+N)
